

## Workplace Infectious Disease Prevention

The Infectious Disease Prevention training course introduces employees to the basic practices of identifying, reducing, eliminating and reporting hazards associated with their work.

This 3 hour training is designed for any worker that wants to acquire knowledge on workplace health and pandemic response.

Completion of this course and submitted procedures results in a Healthy Business Certification from the Tennessee Chamber of Commerce & Industry.

### Summary of Course Objectives:

Participants will become familiar with the standards and regulations that OSHA, the Center for Disease Control & Prevention (CDC) and the World Health Organization (WHO) have set in place to make sure all employees function in a healthy work environment.

-  Understand how to develop a step-by-step Healthy Workplace Environment Guide;
-  Learn best cleaning and disinfection procedures;
-  Review on-site health screening procedures;
-  Determine Personal Protective Equipment (PPE) requirements;
-  Discuss social distancing strategies;
-  Understand protocols for isolating employees who become ill at work;

# Workplace Infectious Disease Prevention

An infectious disease could be the single greatest threat to business continuity. Businesses are looking for ways to keep employees, customers, supplier and their communities healthy. This training provides businesses with guidelines and best practices for developing their companies' policies and procedures for a healthy workplace.

Keeping employees healthy is not only the right thing to do but also makes good business sense. Absenteeism can rise 15-30% due to sickness, quarantines and family care responsibilities. Managing through requires constant communications and discipline towards your policies.

## Course Objectives:

- ▲ Understand the purpose of Infectious Disease Prevention;
- ▲ Recognize the roles of managers, supervisors and employees;
- ▲ Identify the types of mitigation and how they are used;
- ▲ Recognize potential hazards;
- ▲ Identify the key components of an Infectious Disease Prevention Plan;
- ▲ Identify steps to follow to perform testing;
- ▲ Define key elements of a periodic inspection and audits;
- ▲ Recognize the importance of best practices for the most effective program implementation and operation;
- ▲ Learn long-term strategies for introducing and embracing technology in order to eliminate/reduce touchpoints and human contact.
- ▲ Utilize the resource guides that includes the OSHA standard, CDC and WHO checklists;
- ▲ Construct and implement an effective, compliant Infectious Disease Prevention program, including an easy way to write the procedures.

At the completion of this course and after submittal of your business' procedures, a Healthy Business Certification will be issued by the Tennessee Chamber of Commerce & Industry.
