

SOCIAL DISTANCING WORKSPACE PARTITIONS

Cumberland Container has developed low cost, Social Distancing Workspace Partitions.

The partitions can be used where the situation calls for worker separation to protect employees within the workplace, or on production or assembly lines.

We have tested our Social Distancing Partitions, which are free standing, measuring 74" tall x 36" wide, making them easy to configure, for safely distancing your employees in various workplace settings.

According to CDC, the COVID-19 has a shelf life of 24 hours on corrugated substrates. The partitions can be lightly sprayed with disinfectant. It is not recommended to wipe down or soak the partition.
